Steve Savard
KMOV News Channel 4
Sports Director

Lupus is a chronic inflammatory disease that can
effect various parts of the body, especially the skin,
joints, blood, kidneys, lungs, heart, nervous system,
and/or other body organs or systems.

Lupus affects 1 out of every 185 Americans and can be
difficult to diagnose, as the symptoms come and
go and mimic many other illnesses. Although Lupus
ranges from mild to life threatening, thousands of
Americans die with Lupus each year.

Juvenile Arthritis is the leading cause of arthritis in
children affecting over 200,000 in the United States.
Saint Louis University has the 9th largest pediatric
rheumatology clinic in the country, serving over 1,000
children in the region.
