GOOD CLINICAL PRACTICE FOR SOCIAL AND BEHAVIORAL RESEARCH – ELEARNING COURSE

In September 2016, the NIH issued a Policy on Good Clinical Practice Training for NIH Awardees Involved in NIH-funded Clinical Trials (<https://grants.nih.gov/grants/guide/notice-files/NOT-OD-16-148.html>). Good Clinical Practice (GCP) is an international ethical and scientific quality standard for designing, conducting, recording and reporting clinical trials. The principles of GCP help assure the safety, integrity, and quality of clinical trials. Investigators and clinical trial staff who are competent in GCP principles will be better able to assure that the rights, safety and well-being of human subjects are protected; that clinical trials are conducted in accordance with approved plans and with rigor and integrity, and that data derived from clinical trials are reliable.

The National Center for Advancing Translational Sciences (NCATS), National Institutes of Health (NIH), through the Clinical and Translational Science Awards (CTSA) Program initiated a project in 2014 to streamline and standardize GCP training for clinical study personnel, including researchers conducting clinical trials. Ample GCP training exists for investigators conducting drug- or biologic-related studies, but it does not address clinical trials using behavioral interventions and social science research.

The course modules are available in SCORM 1.2 compliant packages that were created in Articulate Storyline 2. These files are SCORM 1.2 compliant packages that were created in Articulate Storyline 2. These files cannot be viewed or used on a personal computer without a LMS.

Take the course [here](#) or scroll to the bottom of the page for instructions on downloading and uploading the modules to your LMS.

All nine modules must be viewed and completed within an institution's Learning Management System. The LMS should create a certificate of completion for the learner upon successful completion of the modules. Successful completion requires the learner to work through all nine module and successfully complete the knowledge tests and exercises along the way. The course is designed to track progress within your Institution's LMS, and offers an option to print or save a certificate of completion from you institution's LMS.

An "UPCOMING EVENTS" banner with a dark blue background. It features a white gear icon with a yellow graduation cap inside. To the left of the gear is a purple square with the text "18 APR". Below the gear, the text "OBSSR Director's Seminar Series" is partially visible.

A dark purple rectangular box containing the text "The OBSSR Connector" in white, with "BLOG" in smaller white letters below it.

Step 1:

Access the link to the National Institutes of Health, Office of Behavioral and Social Sciences Research from the IRB website or by clicking **HERE**.

Navigate to the link in the middle of the page: "Take the course here. . .", and click "here".

Good Clinical Practice for Social and Behavioral Research eLearning Course

The Society of Behavioral Medicine (SBM) is pleased to offer free National Institutes of Health (NIH) training and certification for good clinical practice in social and behavioral research. Effective January 1, 2017, all NIH-funded investigators and staff who are involved in applying for, conducting, overseeing, or managing clinical trials should be trained in good clinical practice and may be required to show documentation of training completion. Investigators and others are expected to refresh their training every three years.

To begin your training:

- **SBM members, [click here to log in and access training modules](#). You will be able to reset your username and/or password if you have forgotten them.**
- **Non-members, [click here to create a login](#). A login is required to access training modules, save your progress, and issue a completion certificate.**

Training materials were developed by the Clinical and Translational Science Awards Program, funded by the National Institutes of Health Center for Advancing Translational Science. SBM is hosting the training at the request of the NIH Office of Behavioral and Social Sciences Research.

STEP 2:

In the middle of the page, click the link for Non-members: “click here to create a login.”

Good Clinical Practice (GCP) for Social and Behavioral Research – eLearning Course

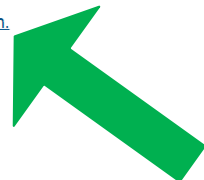

Welcome | Module 1

Welcome to the Good Clinical Practice (GCP) for Social and Behavioral Research eLearning Course.

Please use the links above to navigate through the nine modules of the course. As you progress through each module, the next module link will become active.

Your progress is saved upon completion of each module.

[Please click here to begin.](#)

STEP 6:

Click the link, “Good Clinical Practice (GCP) for Social and Behavioral Research– eLearning Course”

On the course page that launches, click the link “Please click here to begin.”

If you have any questions, please contact the IRB Office at (314) 977-7744.
